ERRATA

The following errors appeared in the published version of the article, "Generalized Single-Case Randomization Tests: Flexible Analyses for a Variety of Situations," by Joel R. Levin and Bruce E. Wampold, Vol. 14, No. 1, pp. 59-93:

1. In Table 5 (p. 76), in the cell associated with the third row and third column, the upper value of 18.3 should be 18.73.
2. On p. 81, in the section titled "Simultaneous Start-Point Randomization for Matched Pairs of Units," the sentence beginning in line 10 should read: "With k_1 acceptable start points for the first pair and k_2 for the second, there would be $k_1 k_2$ summed sums and null hypothesis-compatible summed differences for the randomization distribution to test R_{gen} and R_{comp} , respectively (as indicated in the Appendix, p. 89)."

The authors are grateful to Venessa Lall for discovering the errors.
